

FRICKE FILLING SYSTEM

AFS 25

Maximum automation in minimal space

The AFS 25 is a fully automatic below-level filling system with an automatic rotary container table and an integrated capping unit for the precise filling of foaming or explosive liquids.

Its space-saving rotary design enables easy one-person operation and reduces emissions thanks to the integrated extraction system.

Products: cleaning agents and solvents, chemical liquids, mineral oils, glazes

Containers: canisters

Below-level filling: for foaming or explosive liquids – filling below the level

Weight ranges: 2.5 kg - 40 kg

Advantages

- **Precise & clean:** automatic below-level filling with a capacity of up to 180 containers per hour (10 kg containers)
- **Fast & flexible:** quick changeovers for different container types and products, integrated automatic capper for continuous, uninterrupted operation
- **Expandable:** integration of labeling and palletizing systems for maximum efficiency

Options: dust cap remover, infeed table, labeling, palletizing

explosion protection in acc. with ATEX Directive 2014/34/EU
