

# FRICKE FILLING SYSTEM

## EFS 21

### Space-saving and powerful

The EFS 21 is a compact, semi-automatic filling system designed for precise, calibratable below-level filling of foaming or explosive liquids. The moving valve positioned just below the fill level ensures clean and controlled filling.

Thanks to short changeover times, automatic weight adjustment, and a valve that is quick and easy to clean, the EFS 21 is ideal for small to medium filling batches with frequently changing products.

<b>Products:</b>	cleaning agents and solvents, chemical liquids, mineral oils, glazes
<b>Containers:</b>	cans, pails, canisters, drums
<b>Below-level filling:</b>	for foaming or explosive liquids - filling below the level
<b>Weight ranges:</b>	0.5 - 30 kg, 1 - 60 kg, 2 - 150 kg, 5 - 300 kg

### Advantages

- **Precise & safe:** nearly foam-free, calibratable below-level filling with automatic coarse-to-fine flow switching - no dripping
- **Easy & fast:** intuitive one-person operation, short changeover times, and automatic weight adjustment
- **Compact:** minimal space requirements, ready for use with plug-and-play connections

<b>Options:</b>	cap screw device, conveyors technology
	explosion protection in acc. with ATEX Directive 2014/34/EU
	Cleaning-In-Place (CIP) system, emission extraction system
