

# FRICKE FILLING SYSTEM

## FFS 11

### High performance meets maximum flexibility

The FFS 11 is a compact filling system designed for the precise filling of non-foaming liquids. It enables clean, calibratable above-level filling directly on the pallet - eliminating the need for heavy lifting.

Thanks to intuitive operation and automatic weight adjustment, the FFS 11 is the ideal solution for frequently changing products and container types.

<b>Products:</b>	paints, coatings, dispersions, adhesives, bitumen
<b>Containers:</b>	pails, drums, and IBCs directly on the pallet
<b>Above-level filling:</b>	for non-foaming liquids
<b>Weight ranges:</b>	10 - 600 kg, 20 - 1,500 kg, 50 - 3,000 kg. With additional scale 0.5 - 30 kg, 1 - 60 kg

### Advantages

- **Precise & clean:** above-level filling with automatic coarse-to-fine flow switching - no dripping
- **Ergonomic:** intuitive one-hand operation, pallet-level filling - no heavy lifting
- **Flexible:** quick changeovers for different container sizes and products

<b>Options:</b>	powered conveyor technology
	explosion protection in acc. with ATEX Directive 2014/34/EU
