

# FRICKE FILLING SYSTEM

## FFS 41

### Precise filling for large containers

The FFS 41 is a high-performance filling system designed for the precise filling of non-foaming liquids. The tracking nozzle operates just above the fill level, ensuring clean and controlled filling - even with large containers.

Multiple containers can be filled directly on the pallet - fast, ergonomic, and without heavy lifting.

### Advantages

- **Precise & clean:** above-level filling with a tracking nozzle - no dripping
- **Ergonomic:** intuitive one-hand operation, pallet-level filling without heavy lifting
- **Flexible:** quick changeovers for different products and container sizes
- **Fast:** high IBC throughput with two weighing systems

**Products:** paints, varnishes, dispersions, adhesives, bitumen

**Containers:** pails, hobbocs, and drums directly on the pallet, IBCs

**Above-level filling:** for non-foaming liquids - filling above the level

**Weight ranges:** 10 - 600 kg, 20 - 1,500 kg, 50 - 3,000 kg. With additional scale 0.5 - 30 kg, 1 - 60 kg

**Options:** conveyor technology

exhaust system for emission reduction

explosion protection in acc. with ATEX Directive 2014/34/EU
